IF YOU CAN IMAGINE IT...WE CAN MAKE IT!

We have been making the highest quality outfield and backstop wall pads since our incorporation. That's our philosophy, no matter how simple or complex your needs may be. If your project requires custom configuration, additional fastening strength, or an innovative product design, our experienced team of designers can help you design it. Once finalized, we'll make the padding system in our factory to your specifications, ready to be installed at the job site. In our portfolio, you will find many pictures of great looking field wall pads that we have produced at both the high school level and professional level.

Our entire system of wall and fence padding, custom specialty padding, backstop padding, design and print work is manufactured under one roof in a quality-controlled environment, a unique benefit in the wall padding industry. Our precision fabrication expertise means that you and your clients are assured superior watertight, protective padding for years to come.

6-color PLUS WHITE printer **The industry's gold standard!**

Fieldwallpads.com boasts a digital printing process that will impress you, whether you want team logos or sponsor advertisements on your padding. Durable UV curable inks let us print your artwork directly onto the vinyl fabric. You will get a brilliant image that doesn't peel or tear like a decal. Our designers can take an existing design or create something that will amaze you. All printing is done in-house, under the same roof that manufactures your pads.

- 6-color PLUS WHITE printing process
- Can print on ANY color of vinyl padding
- No peeling or tearing like a decal
- Printed under the same roof as manufacturing
- FREE design mock-ups and revisions until you're happy!

FIELDWALLPADS.com

Stadium Padding by Fieldwallpads.com are designed for safety & durability!

- 3/4" sealed exterior plywood
- 3" high-impact foam
- 18 oz. vinyl with stainless steel staples
- UV, water, and mildew resistant vinyl

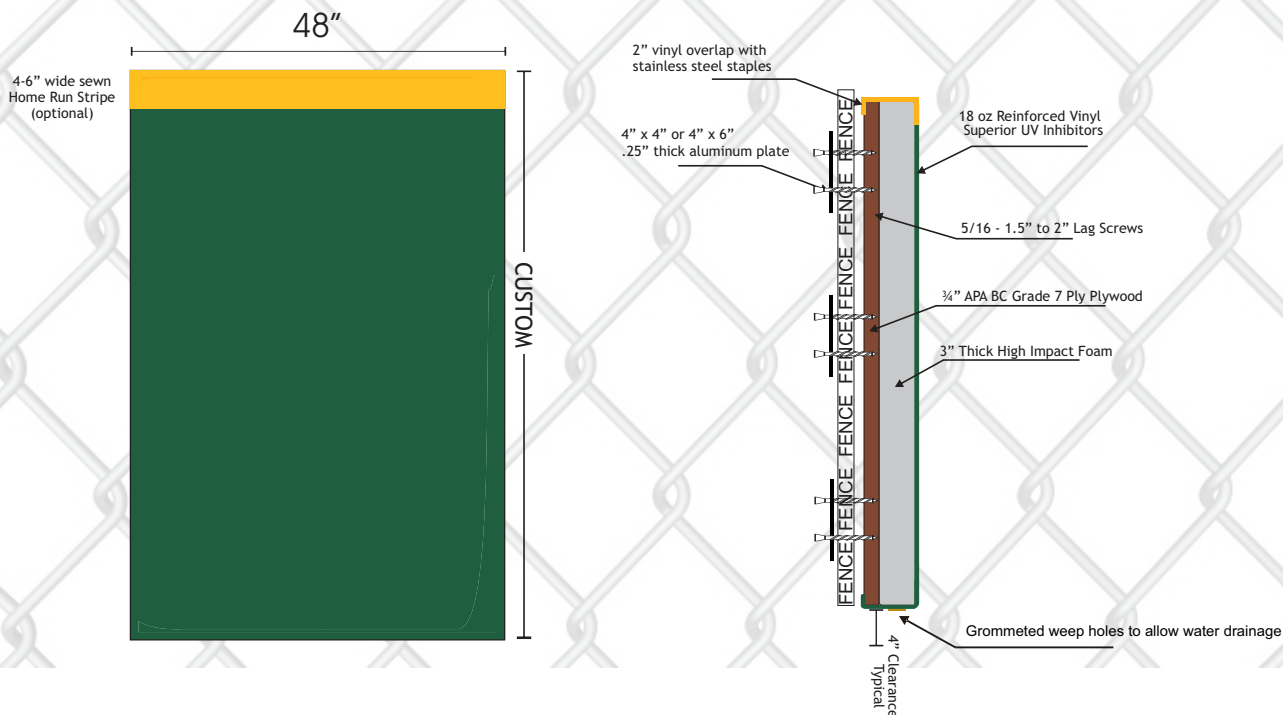

STADIUM PADDING

SPECIFICATIONS

Field Wall Pad (FWP) - Chain Link Fence application

Field Wall Padding Specifications Plywood Backed Pads / Exterior Use (FWP)

Backing: 3/4 inch APA BC exterior grade 7 ply plywood, primed on edges and backside. Exposed plywood surface is painted to match vinyl color when exposed to view.

Vinyl Covering: 18 oz. per sq. yard laminated vinyl, unbalanced coating. Fabric: 1000 Denier Polyester Basic Fabric, Tear Strength Test: Warp 100 lbs., Fill 315 lbs., Tensile Strength: Warp 300 lbs., Fill 300 lbs., Weft Insertion: 18x17, Superior UV inhibitors, Cold Crack: Minus 40 degrees Fahrenheit. Colors per manufacturer's standard selection, as selected by Architect. Vinyl cover is wrapped around the backside of plywood and stapled every 3" with stainless steel staples. Each pad has 3 weep holes to evacuate moisture. 10 mils top x 4 mils bottom.

Filler Foam: 3" thick High-Impact Foam. Filler foam is glued to plywood backing.

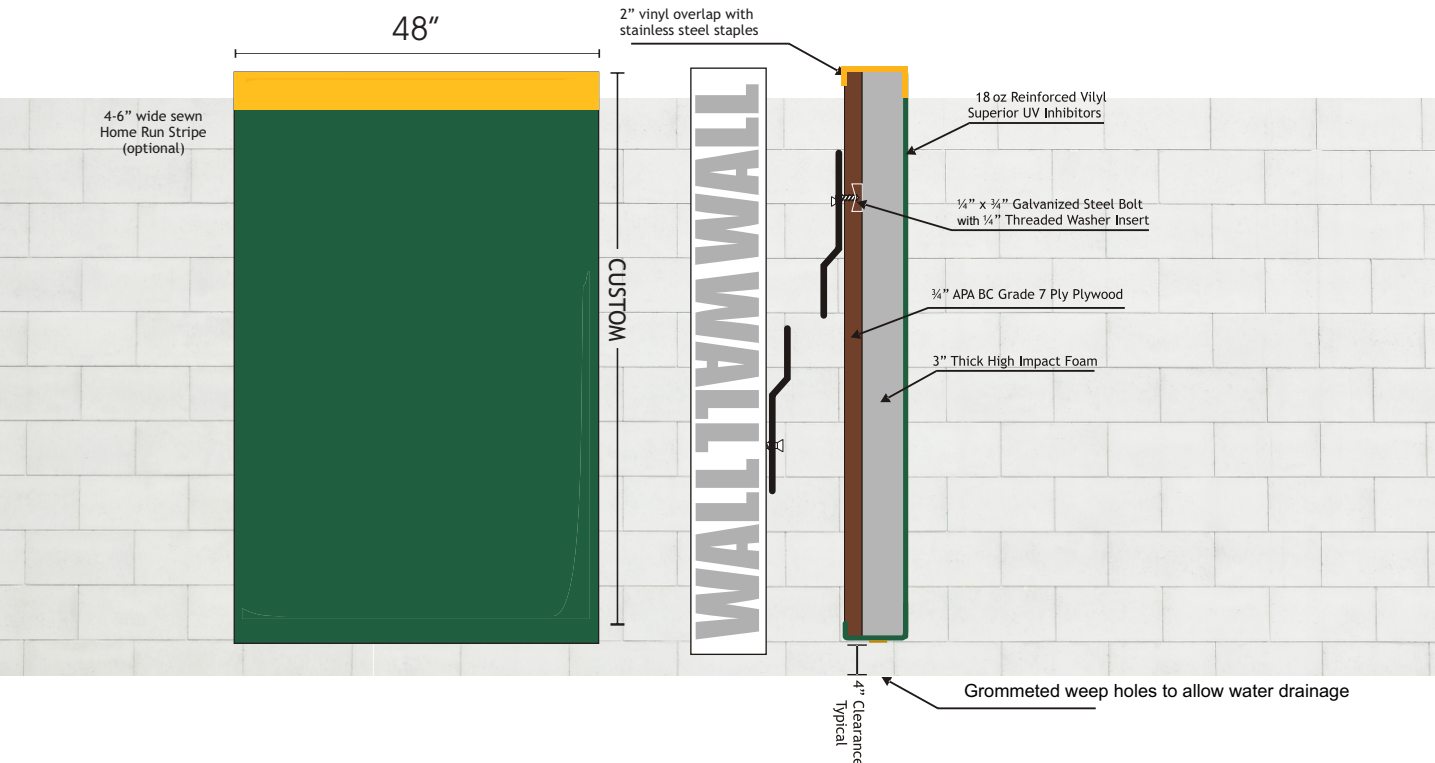

Adhesive: Synthetic Elasto Meric Adhesive, High Flexibility Factor, Water Resistant, Heat & Cold Resistant, High Bonding Factor.

Attachment: 4" x 4" or 4" x 6" PE HD square and round plates with lag screws.

INDOOR WALL PANELS

Indoor wall panels by Fieldwallpads.com are designed for safety & durability!

- 7/16" and 3/4" sealed wood backing
- 2" or 3" high-impact foam
- 14 oz. or 18 oz. vinyl covering
- Plain or full color digital print

INDOOR WALL PANELS

SPECIFICATIONS

PN (2")

2" Foam - 7/16" OSB - Top & Bottom Nailer application

COMPONENTS

BACKING:

7/16" OSB backing

CORE:

2" Open-cell polychloroprene latex compound

COVERING:

14 oz. Leather-like laminated vinyl

ATTACHMENT:

Hex Washer Head Concrete Anchors
1/4" x 1.25" to 1.50" (not included)

SPECIFICATIONS

PN A (2")
2" Foam - 7/16" OSB - Top & Bottom Nailer

Class 'A' Wall Padding

Our flame-retardant padding carries a "Class A" rating in accordance with NFPA-286 test procedures.

Our CR SAFEGUARD fire-resistant wall padding is manufactured utilizing low smoke polychloroprene latex compound. Fire-resistant properties shall not change if exposed to liquids. Cushioning is open-cell and breathable.

With 2" open-cell foam, we use 7/16" OSB backing, sealed with fire retardant paint and the foam is covered with 14 oz. vinyl, enhanced by a leather-like emboss pattern.
